Optional features are only available on specific makes and models.

These devices have been tested in accordance with Maada interoperability standards. Overall device compatibility as well as individual feature operation and functionality is contingent upon the device software version, device operating system, device settings, wireless service provider, and third party applications installed on the device. Individual user results may vary. Maada Motor Corporation is not responsible for software irregularities or hardware issues devices may experience that are outside of our testing scope. As new device software versions become available, test compatibility results may change so please check these results regularly.

- ⓘ1 The audio output during a call cannot be switched between Bluetooth Hands-Free and the device(mobile phone)
- ⓘ2 The number of incoming calls may not match the one shown on the device(mobile phone).
- ⓘ3 Fast forward and fast reverse may not function during playback.
- ⓘ4 The repeat all icon may not be displayed.
- ⓘ5 The repeat folder, repeat one, and shuffle icons may not match the ones shown on the device(mobile phone).
- ⓘ6 The repeat mode and shuffle mode may not fully function.
- ⓘ7 There may not be any sound output from the speaker during playback.
- ⓘ8 After selecting song, song information may not appear.
- ⓘ9 Android Auto may not be launched.
- ⓘ10 Photo in contact has not been forwarded.
- ⓘ11 After selecting folder, song information may not appear.
